

## What MATHCOUNTS Does

**MATHCOUNTS**, the first nationwide program of its kind, combines the efforts of education, business, government, and the technological community to promote math excellence among 6<sup>th</sup>, 7<sup>th</sup>, and 8<sup>th</sup> grade students.

**MATHCOUNTS** was developed as a positive and rewarding solution to reversing the current problem of math illiteracy—and as a way to make parents, educators, and the general public aware of career opportunities in math.

**MATHCOUNTS** impacts these student "mathletes" at an early age when they are formulating attitudes about math and technology—when they can still elect to take college math courses in high school to prepare them for future math careers. In fact, career planning is a major component of **MATHCOUNTS**.

Information on local sponsors, their fields of industry—and how careers in math relate to those industries—can be made an integral part of a local **MATHCOUNTS** information packet.

## How MATHCOUNTS Works

The competition phase of **MATHCOUNTS** begins in the schools—thousands of them across the country—in the form of a qualifying test. Students are coached in everything from basic arithmetic skills to math logic, probability and statistics, linear algebra, and polynomials.

Between September and the national competition in the spring, students and teachers work together in quizzes and drills to develop teamwork and skill. They are then ready to advance to regional and state competitions, which could lead them to Washington, D.C. and the national math finals.

## How the Contest is Funded

The **MATHCOUNTS** local and state competitions are funded by NSPE, its state and local chapters, and businesses and industry sponsors like you.

As a **MATHCOUNTS** sponsor, you can contribute funds—as little or as much as you like—to fund a **MATHCOUNTS** contest. And you can contribute your time and talent to help your community's **MATHCOUNTS** efforts. By supporting **MATHCOUNTS** in your community you will be helping to tackle a vital national issue—improving the math and science abilities of our youth—on the local level. At the same time, you will have the opportunity to:

- Demonstrate your concern for quality education
- Better prepare young people for productive careers
- Insure the technological future of our nation

## What's In It For You?

As a sponsor, you can benefit from **MATHCOUNTS**. Your sponsorship can:

- Enhance the image of your firm.
- Increase your firm's visibility in your community and increase the possibility of media exposure for your company.
- Help foster goodwill in your community.
- Help foster and/or improve business relations with other businesses in your community.

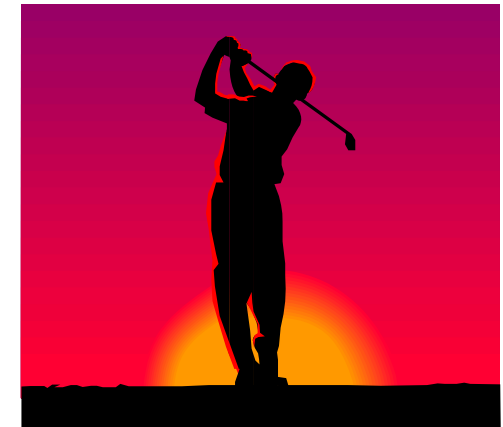

*Help today's students—  
tomorrow's employees—  
develop the mental skills  
required of a quality  
workforce.*
