

Deanna Stockton, P.E., C.M.E., Princeton's Deputy Administrator of the Infrastructure & Operations Department and Municipal Engineer, has dedicated more than twenty years to improving the quality of life for residents of Princeton and New Jersey. Her departmental oversight includes municipal / land use engineering, transit system / parking, public works / sewer, and fleet. Ms. Stockton brings extensive experience to her public service roles, having worked at public agencies in California, the Washington State DOT, and as a water rights and land development consultant in Oregon.

Ms. Stockton currently participates with the New Jersey Society of Municipal Engineers (NJSME) as an Executive Committee member and representative to the New Jersey League of Municipality's Legislative Committee. She is a Past President of NJSME as well as the New Jersey Society of Professional Engineers Mercer Chapter (PESMC).
